

Quality Policy

African Centre for Technology Studies is committed to undertaking capacity building, research, providing advisory services, and monitoring trends in science and technology and disseminating information for sustainable development in order to meet stakeholders' needs.

This shall be achieved by:

- Promoting, encouraging, inspiring, studying and building the institutional framework requisite for the development, management, exchange, assessment and transfer of technology for sustainable development and utilization & conservation of natural resources.
- Fostering the exchange of information and networking in collaboration with universities and other governmental and private institutions and individuals that have similar or related interests at local, national, regional and international levels, with particular emphasis on policy matters.
- Developing information systems and other analytical tools for the development and management of policy.
- Conduct, organize, support & promote, enhance & facilitate projects and programmes (seminars, symposia, workshops, consultations, show exhibitions) and other activities designed to foster the growth of public awareness on the role of science and technology in sustainable development.
- Maintaining a Quality Management System that meets the requirements of ISO 9001: 2008 Standard
- Maintaining operations in accordance with National and International statutory and regulatory requirements.
- Establishing measurable objectives that satisfy profitable and sustainable growth by providing premium quality services that ensure high levels of stakeholders' satisfaction through continuous improvements to our system.

Dr. Cosmas Ochieng
Executive Director
